ABOUT

KASK, based in Italy, specializes in the developing, designing, and manufacturing of safety HELMETS of the highest quality. In every field of application KASK helmets are at the forefront, be it cycling, downhill, skiing, ski touring, mountaineering, climbing, rescue, work safety and horse riding helmets.

Born in 2004, KASK is a relatively young company, but thanks to a talented team of expert engineers and partnerships with Italy's market-leading factories, in this short time the company has gone through a tremendous evolution marked by success all along the way. KASK has been awarded with prizes like ISPO AWARD.

KASK quality is a guarantee as a result of many carefully monitored safety tests and innovative technologies used in the designing of the helmets.

All our products are 100% made in Italy and passed through the most rigorous safety and quality tests of the KASK's distinctive Comfort Safety Design.

KASK WG11 Rotational impact test

KASK has always been committed to creating products that provide both excellent safety and comfort, exceeding requirements set by international standards and norms.

KASK WG11 test is an internal protocol adopted by KASK to identify an objective method, based on scientific sources, for measuring the performance of its helmets against rotational impacts.

Most helmets tests use rotational impact prevention technologies with headforms that have a higher coefficient of friction than those of the human skull and therefore may not reflect what occurs in some accidents.

The "pass-fail" criterion is based on the BrIC value, an algorithm that defines the level of brain injury. This value must be lower than 0,68.

The final test protocol is:

OBLIQUE IMPACT TESTS

- oblique tests @ 45°, impact speed 6 m/s, BrIC < 0,68
- + grade 80 closed-coat aluminum oxide abrasive paper
- + headform nominal coefficient of friction 0,3
- + wireless system: triaxial accelerometer + n. 3 ARS

Headform: EN960 serie

Measurements:

Peak of rotational acceleration, Peak of linear acceleration, HIC, BRIC (< 0,68)

All KASK helmets successfully pass this test, with values that are substantially less than 0,68 BrIC 0,390.

*ROTATIONAL IMPACT WG11 TEST PASSED is a KASK registered trademark. The ROTATIONAL IMPACT TEST PASSED is a KASK internal oblique impact test that measures the performance of its helmets against rotational impacts. This Test has not been adopted by CEN or its Working Group CEN TC158/Working Group 11.

0.68

BrIC peak value (Brain Injury Criteria)

The BrIC value is an algorithm that defines the typical level of brain injury. This value must be lower than 0.68 – the lower, the better.

0.39

Our BrIC value is never above 0.39.

**LAB TESTED.
SLOPE APPROVED.**

 **6 m/s**

Rotational impact tested

Based on science and realistic impact scenarios, we test all our helmets for rotational impact reduction at a minimum speed of 6 m/s.

OMEGA

Meet OMEGA, our latest ski helmet and our first racing helmet – made entirely in Italy.

What started as a project to develop a world cup helmet for speed disciplines resulted in a helmet at the intersection of excellence and performance. The OMEGA combines KASK's proven success in the world of cycling with input and analysis from pro world cup skiers. Wind tunnel testing confirmed that the OMEGA is among the best in its class, yet it offers more: a perfect fit and a tailor-made feel.

If you like speed, the OMEGA is the only helmet you need.

CARBON FIBER SHELL*

The OMEGA takes advantage of carbon fiber's extraordinary properties to result in an ultra-lightweight helmet with an aerodynamic shape and the uncompromising strength of carbon fiber.

*Only in the Omega Carbon version

LIGHTWEIGHT

The helmet's material composition and design combine to make it one of the lightest competition helmets available.

AERODYNAMIC

Minimizing drag was key to developing the OMEGA. By testing the helmet with professional skiers in actual race conditions, we were able to optimize its aerodynamic profile to maximize marginal gains.

GOGGLES HOLDER

A special racer-specific goggles holder has been built into the helmet to elevate the OMEGA's appeal and functionality.

PERFECT FIT

Available in five precise sizes in order to guarantee a perfect fit without needing a side adjuster.

*weight can change depending on the colour/type of paint used

A misty, snow-covered forest of evergreen trees on a mountain slope. The trees are densely packed and their branches are heavily laden with snow. The mist is thick and white, creating a soft, ethereal atmosphere. The overall color palette is dominated by whites, greys, and muted greens.

KHIMERA

After many hours spent in design, research and development, we proudly introduce KHIMERA.

A cleverly executed carve turn in direction for our Snow collection, KHIMERA offers the rarest of combinations – beauty, comfort and safety. Our lightest helmet to date and exceptionally breathable, it's perfect for long days out and on the slopes.

And being 100% Italian designed and made, it makes zero compromise on style and safety. Be free to roam, free to express yourself and free to surrender entirely to every compulsion stirred by the most challenging runs. KHIMERA.

Protect your head, preserve your style.

ACTIVE VENTILATION SYSTEM

The Active Ventilation System is easy to use by simply sliding the upper part of the helmet, which adjusts the amount of air flow. The Integrated Airflow Control System allows for a larger and wider ventilation. On the back of the helmet is a dedicated exit port for the front air.

CLICK-IN SYSTEM

The connection between the removable and washable inner padding and the shell is enhanced thanks to the Click-in System. Its design is discreet and minimal, with four pins that easily fit into the shell. The effective simplicity of the Click-in System ensures great comfort all round.

LIGHTWEIGHT

KHIMERA it's one of the lightest ski helmets on the market with a weight of 500 g in the medium size.

GOGGLES HOLDER

KHIMERA helmet has an integrated goggles holder to fix securely and safely the goggles.

TPU EARFLAPS

Compare to the standard fabric earflaps, the TPU material increases the weather resistance such as water and moisture, providing even better comfort and flexibility.

FRONTAL GOGGLES VENTILATION

The dedicated port in the front allows the flow of the air to the goggles, preventing fogging.

PIUMA-R

PIUMA was one of the first helmets we designed. We poured all of our passion, dedication, and design mastery into keeping this king of the slopes on an upward trajectory improving it season by season. The result? A piece of engineering art, ready to bring light, clarity and confidence to the blackest of black runs with features like armoured innovative optics to ensure optimal and precise navigation.

The all-new PIUMA-R is 100% Italian designed and made to offer a rare combination of beauty, comfort and safety.

Protect your head, preserve your style.

CLICK-IN SYSTEM

The connection between the removable and washable inner padding and the shell is enhanced thanks to the Click-in System. Its design is discreet and minimal, with seven pins that easily fit into the shell. The effective simplicity of the Click-in System ensures great comfort all round.

MERINO WOOL INNER PADDING*

Thanks to the properties of Merino wool, the internal padding provides unmatched comfort. The Merino wool natural fibre in contact with the skin keeps the body temperature, ensures high breathability and dries quickly.

*except for Class Sport models

PERFECT FIT

PIUMA-R is available in thirteen sizes to meet everyone's need and guaranteeing the perfect fit.

ACTIVE VENTILATION SYSTEM

The active ventilation system integrated in the helmet allows the better cooling airflow. Using the lever on the rear, the amount of air flow can be adjusted to suit the skiers needs.

ELASTIC GOGGLES HOLDER*

The ski goggles can be fixed securely and safely on the helmet with a new Elastic Goggles Holder.

*for goggles compatible versions only

ONE-MOVE SWITCH

Changing visors has never been so easy: with one simple movement of your finger you can detach or attach the visor. The One-Move Switch System fits perfectly in the helmet design.

PIUMA-R VIBES

Piuma-R Vibes is an innovative version of our iconic helmet featuring an audio system with bone-conduction technology. It is designed to listen to music, make or receive calls via a Bluetooth® link to your smartphone. Listening through bone-conduction technology allows you to continue hearing environmental noises (voices, noises, alarm signals) during use, ensuring greater safety and greater fun while doing your favorite activity.

VOLUME
110dB +/- 3dB

BONE CONDUCTION AUDIO
Transmitting sound vibrations through the bones, it allows users to hear crisp, clean sounds without uncomfortable earbuds, while staying in touch with their surroundings

BLUETOOTH® CONNECTION
The latest Bluetooth® 5.2 Conference Technology, lets to communicate whenever and wherever you want. Compatible and paired devices are recognized and if contact is lost, they are automatically searched for to restore the connection and this allows you to use all the functions of your devices, smartphones, tablets, mp3 players and GPS systems.

VOICE-ACTIVED CONTROL
Through the various voice activation systems, it allows you to answer the phone, receive info from the network, listen to music, etc., all hands-free without even taking off your gloves and stop skiing.

WINDPROOF DIRECTIONAL MICROPHONE
Microphone with ambient noise suppression system, able to pick up a clean sound from the wind, while skiing down the slopes.

WATER RESISTANT
IP56 degree of protection: protection against dust so that it doesn't interfere with the operation of the device and against strong jets of water from any direction.

UP TO 8 HOUR CONTINUOUS USE
+/- 17h talk time, +/- 20h music time, +/- 625h standby time

*Every PIUMA-R is available in Piuma-R Vibes version.
This audio system is not available as a spare accessory.

REDA ACTIVE

MERINO WOOL

WASHABLE

Reda Active fabrics are machine washable. The technology used in making a compact yarn increases its washability and give the possibility to have a clean helmets inner padding every new ski season.

THERMAL CONTROL

The thermal comfort offered by a Reda Active fabric is extremely elevated thanks to the textile's fine, crimped fibers and their ability to trap still air while allowing your skin to breathe at the same time. The fiber is hydrophilic, allowing it to wick away moisture thru the helmet's ventilation channels.

ZQ MERINO

100% New Zealand ZQ-certified Merino wool. All Reda Active Merino wool is mulesing free and traceable.

SOFT TOUCH

The Merino wool yarn used in Reda Active fabrics is super fine and soft to the touch, preventing irritation. By using CompACT spinning technology the helmets comfort is guaranteed.

ANTI-ODOR

Reda Active Merino wool is characterized by natural antibacterial and hypoallergenic properties that prevent the build-up of unpleasant odors inside the helmets.

HIGHLY BREATHABLE

The CompACT³ technology used by Reda Active combines a large number of fibers in the construction of the yarn. By increasing the number of fibers, more air is able to pass through, allowing sweat to be absorbed and evaporated more efficiently and providing greater comfort thanks to improved thermoregulation.

100%
MADE IN ITALY

100% MADE IN ITALY

Reda Active fabrics are machine washable. The technology used in making a compact yarn increases its washability and give the possibility to have a clean helmets inner padding every new ski season.

KOO | e y e w e a r

A B O U T

KOO is an innovative sportswear brand specializing in developing, designing and manufacturing high-performance sunglasses and goggles of the highest quality.

KOO is setting the trend with cutting-edge eyewear which, entirely designed and crafted in Italy, seamlessly blend technological excellence, superior materials and an iconic design.

All KOO products are manufactured to the highest standard with rigorous testing to ensure consistent quality and safety, and fitted with premium **ZEISS®** lenses as standard – for unparalleled clarity and protection.

S N O W G O G G L E S

E N E R G I A

The ENERGIA goggles have been engineered to provide you with safety, comfort, and performance in a minimal design. Supercharge your next ski run with ENERGIA goggles.

**T R I P L E - L A Y E R
F O A M**

The No-Pressure Design combined with comfy triple-thick foam guarantee exceptional comfort and performance.

V E N T I N G S Y S T E M

An anti-fog treatment on the lens interior together with built-in vents help reduce condensation for clear vision in all conditions.

**L I G H T W E I G H T
F R A M E**

KOO ENERGIA goggles offer a minimalist look combined with a hybrid lens for maximum vision comfort.

**I N T E R L O C K I N G
L E N S S Y S T E M**

The lens can easily be swapped out for any of the five optimized lenses designed to perform in different light conditions. By pulling down on the frame's lower arch, the lens is released and seamlessly slides out. The new lens is inserted into the upper part of the frame and positioned correctly in place. Once again, the frame's lower arch is pulled down to fit the lens's lower edge. A gentle push is all it takes to secure it in place.

H Y B R I D

LENS BY **ZEISS**

The precise vision offered by the curvature of a cylindrical lens, when combined with the wide vision guaranteed by a toric lens shape, produce an excellent no-compromises hybrid lens.

**1 0 0 % U V
P R O T E C T I O N**

KOO ENERGIA goggles guarantee total eye protection from UV rays (100% UVA, UVB, and UVC protection).

E C L I P S E

A high-tech concentrate conceived for people who live life and see skiing as a challenge, pushing their limits at full speed. Unique safety and comfort combined with an innovative and dynamic design.

R I V E R R A D A M U S
Youth Olympic Games and World Junior Champion

**T R I P L E - L A Y E R
F O A M**

The triple-layer foam guarantees exceptional comfort to complement the ECLIPSE's leading visual clarity and exceptional appearance.

**I N T E G R A T E D
V E N T I L A T I O N**

Crystal clear and fog-free vision are guaranteed in all conditions thanks to vents engineered into the goggles' design.

**E L A S T I C
B A N D**

Adjustable band with silicone strips for the best comfort and grip.

S L O T - I N S Y S T E M

KOO ECLIPSE goggles' Slot-in System for switching lenses is fast and simple. The lens can be removed simply by pushing it from left to right until the hooks are disengaged. A sliding movement from right to left combined with a gentle pressure on the lens, will reinstall the lens.

C Y L I N D R I C A L

LENS BY **ZEISS**

The sharp-looking KOO ECLIPSE goggles feature a high-performance cylindrical lens by ZEISS® to give you the most precise vision.

**1 0 0 % U V
P R O T E C T I O N**

KOO ECLIPSE goggles guarantee total eye protection from UV rays (100% UVA, UVB, and UVC protection).

Changing light conditions while practicing snow sports place high demands on the skier's or snowboarder's concentration and visual efficiency. The need to immediately recognize irregularities in terrain, such as hummocks or hollows, icy sections or other such hazards is key for the skier or snowboarder to react quickly and avoid potential injuries. **UNVEIL by KOO** provides a superior contrast perception and high brilliance of colors and contours, improving visual clarity during skiing or snowboarding, even at high speed.
