TSL OUTDOOR, GO YOUR OWN WAY.

A story of passionate people dedicated to make their playground accessible to anyone. TSL it is 40 years of product innovation, 40 years of sharing experiences, and 40 years of creating snowshoes history in Europe. TSL is the reference snowshoes brand and the snowshoes leader on the European market.

We, as a company and moreover as a family, have always worked towards consistent, irreproachable product quality, but also on a close, strong and friendly relationship with our customers.

We've built our company from the ground up in the heart of the French Alps (Annecy-France).. The mountains are our natural habitat, our passion, our source of inspiration, and our laboratory. We care about sustainable development and we're aware of how fragile our environment is. This is why we keep an eye on our production and on its impact on the environment by manufacturing our products in the Alps, in France (Snowshoes, Poles, Sleds, Yooners...).

For 40 years, TSL Outdoor's team has been sharing its love of mountains, outdoor life and nature discovering. TSL Outdoor is more than just products, it's a free spirit, a way of life...

# ECO-DESIGN

TSL is a family business and, just like any family, its development stems from the values held by the people who form it. Consideration is a key element of the TSL adventure, both towards humans and towards the planet that hosts us, as one cannot happen without the other. This is why we have made it a point of honour to manufacture eco-designed products for over 40 years, in an environment that we can control and where we can keep a kindly eye on the men and women who make up TSL, here, at home, in the French Alps.

## A committed design

At TSL we are committed to offering sustainable products, which is why we design 100% repairable products: an assembly of parts for greater versatility that allows us to extend the lifespan of our products considerably. We guarantee to repair any product for up to 10 years, although in reality we sometimes give a second life to snowshoes that are more than 20 years old!

And finally, any product entails packaging. At TSL we strive to minimise the environmental impact of our packaging by eliminating avoidable packaging, replacing polybags with more easily recyclable materials or creating packaging that is useful and can will have a long life, such as our covers.

### Thoughtful manufacturing

After the design comes the manufacturing. It is entirely natural for us to have selected our partners and subcontractors within a 100km radius for 95% of them. The closer we are, the easier it is to discuss, to get a better understanding of parts and the way they are produced and, above all, it ensures low impact transportation. As energy will be a real issue for the future, for years TSL has been making it a point of honour to use only 100% renewable energy to promote its development in mainland France. Keeping things local one of the foundations of the family business, which has always chosen to keep its production in France in order to be able to offer quality products and service, and particularly after-sales service. This proximity also allows us to work on a just-in-time basis and thereby avoid waste and surplus stocks. The company can also sort all its production waste and recycle it to give it a second life.

### People at the heart of the project

People are what TSL is all about. This tale of family entrepreneurship would lack flavour without all the people who make it up. At TSL, we pay particular attention to the well-being of each individual working in the company. A smile, friendliness and kindness are the only objectives required.

Our motto: "Teamwork makes the dream work "

# AFTER-SALES SERVICE

At TSL we are committed to developing sustainable products, which is why our snowshoes are 100% repairable.

Our spare parts catalogue contains more than 1,000 items that we guarantee to keep for at least 10 years, allowing us to replace damaged parts even after many years of use.

We carry out all snowshoe and pole repairs directly in our repair workshop in Annecy le vieux.

In some cases, it is also possible to repair your snowshoes at home, and to this end, we ship spare parts all over the world on a daily basis.

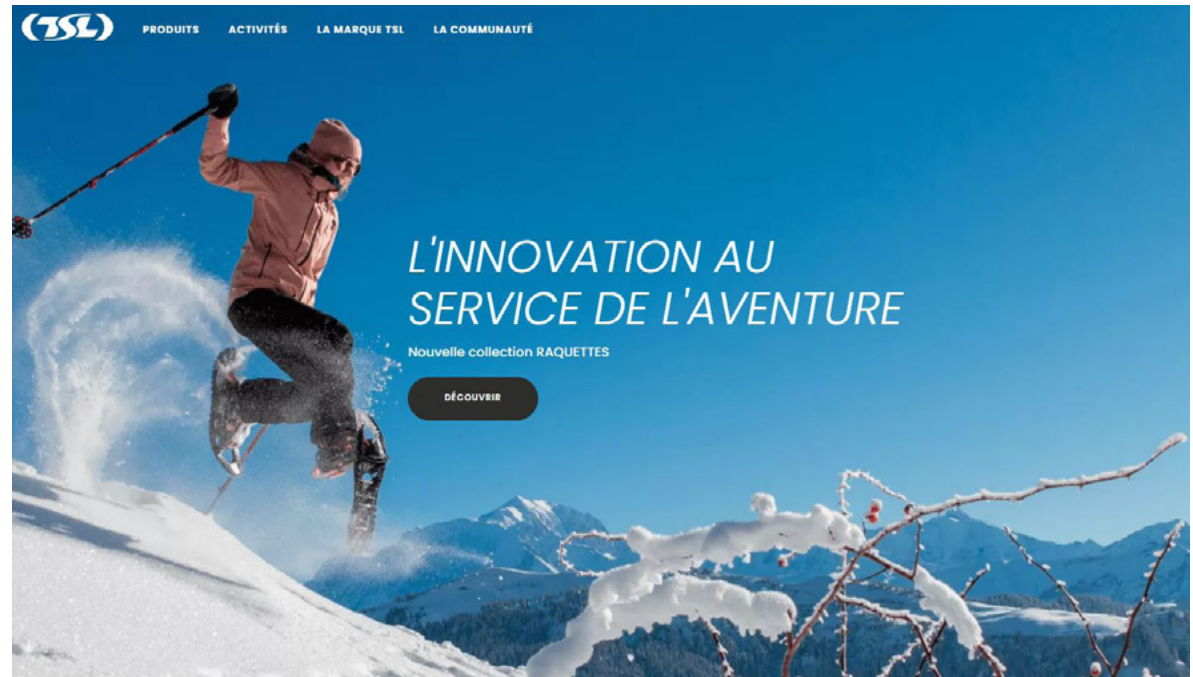

Scan this QR code to access the after-sales tutorial videos.

# WEBSITE

Our website has been given a facelift and now you'll find:

- The entire TSL Outdoor range: Product information, technologies, brand history ...
- The world map with all our outlets
- Marked and secured snowshoeing routes in France
- A list of ski resorts that allow Yooner on their slopes
- A Pro Space with catalogues, documents, product photos and videos that can be downloaded for free

# TSL TEAM

The @teamtsloutdoor is 6 exceptional Trail Running athletes! Coached by Emilien Bochet, the team is among the Trail Running elite.

The strength of the group lies in the varied profiles of the runners: different talents that come together to create a powerful and versatile group.

Team spirit and cohesion are TSL values that are well represented by the Team.

Equipped with Trail poles and Trail Finisher bags, they are our best ambassadors. We hope that they enjoy themselves and achieve the performances they dream of.

# EVENTS / PARTNERSHIPS

Discovering new activities, testing our products, meeting our customers, enjoying unique experiences, supporting associative and sporting projects: these are all reasons that make us want to move forward and help our company grow in the long term. Equipping you and being part of your adventures is our greatest source of pride and achievement. This is how we give meaning to our work!

As a French outdoor brand, our wish is to share our passion and to help as many people as possible discover outdoor sports.

How?

By taking part in numerous events throughout the year

By offering free product testing days throughout France

By organising and collaborating on sports and entertainment events

- Snowshoes
- Trail
- Nordic Walking
- Yooner

As a company that is committed to the environment and to people, we also support projects with which we share common values: ecological, associative, educational and informative.

Do not hesitate to let us know your needs for sponsoring, endowment or equipment loans: we will be happy to assist you: [partenariats@tsloutdoor.com](mailto:partenariats@tsloutdoor.com)

# SYMBIOZ HYPERFLEX

## racing

The Symbioz Racing has been specially designed for high-speed snowshoe enthusiasts. Their extreme flexibility offers a completely aturalfeeling stride, fantastic weight transfer and unparalleled lightness (330g/0.70lbs per foot), making these snowshoes a natural extension of your body.

This model complies with both European and American standards for snowshoe racing.

**HYPER***flex*  
concept

### TRACTION

Great grip, 4 inter-changeable tips, traction bars. Mobile, 3-position rear crampons for optimal heel support.

### NATURAL STRIDE

The Hyperflex Concept frame gives you a completely natural foot-strike and propulsion, ensuring that your stride is as natural as possible for maximum grip on both your snowshoes and the snow. Thanks to its shape memory, these snowshoes store energy when flexed and release it at the end of your stride.

### TRACTION on soft snow

Contact Grip - TSL patents

The composite teeth located below the tips cut and expel snow in order to boost traction when the foot first comes into contact with the ground. Traction is thus reinforced, followed by the crossbars located beneath the frame.

## >> Dynamism

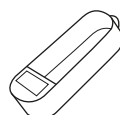

Tighten and loosen your snowshoes in a flash with pre-set adjustments which stores the memory of your foot: pre-adjust the length, the toe and the heel + the tightening strap and slip them on effortlessly.

  
330g x2

comes with a tightening strap for hard-core fans of the ankle-strap.

## GRIP SERIES

### >> Technicality and grip

Technicality, robustness and high performance grip are the words that best characterise the aptly-named GRIP range. Ideal for all types of snow, their frames combined with technical bindings have been designed for hikers who want to venture off the beaten track.

# SMART

## >> Performance and comfort

SMART, walk smart!

TSL presents a new way to approach winter.

Light and minimalist, the SMART is the crafty combination between float and grip, the perfect compromise between snowshoes and walking crampons.

Synonymous with freedom of movement and completely controlled support, the SMART is an extension of the shoe, thanks to its intuitive and precise sole that is completely in tune with the foot. The load bearing surface is at least twice as large, and its grip and traction make walking easier and safer.

Winter is a child's play!

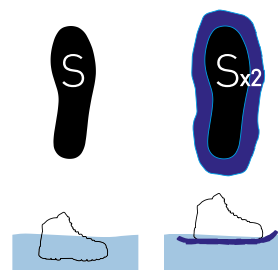

Both the design and the tips of the SMART fully respect the foot's natural walking action.

>> Ease of use

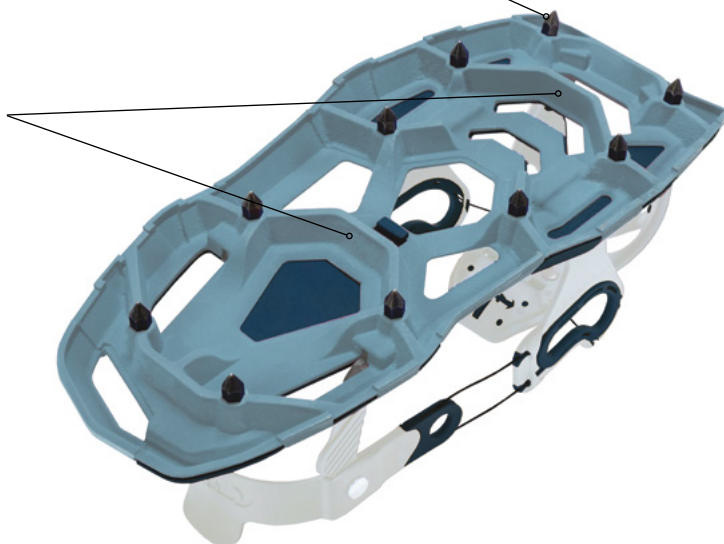

Easy to get on and take off. Thanks to the BOA® Fit System, the shoe is one with

Delivers enhanced walking performance thanks to a load-bearing surface that more than doubles in size

10 interchangeable spikes located underneath the different pressure points, delivering optimum grip and stability.

Traction bars for optimum grip on all types of snow, whether you're going up or down

## WEEZ 1

These toboggans are fitted with real seats and 2 breaks. They have a pleasant design and original colours, and are extremely robust.

80,5 x 46 x 20,5 cm / 31,6 x 18 x 8"  
1,35 kg / 2,95 lbs

## WEEZ 2

These toboggans are fitted with real seats and 2 breaks. They have a pleasant design and original colours, and are extremely robust.

90,5 x 48 x 20,5 cm / 35,6 x 19 x 8"  
1,45 kg / 3,20 lbs

## DIDOO COMFORT

The Didoo envelops and gives maximum protection to young children thanks to its comfortable foam lined bucket seat, its 3-point adjustable belt and its extremely stable design. Didoo is THE ideal sled for beginners!

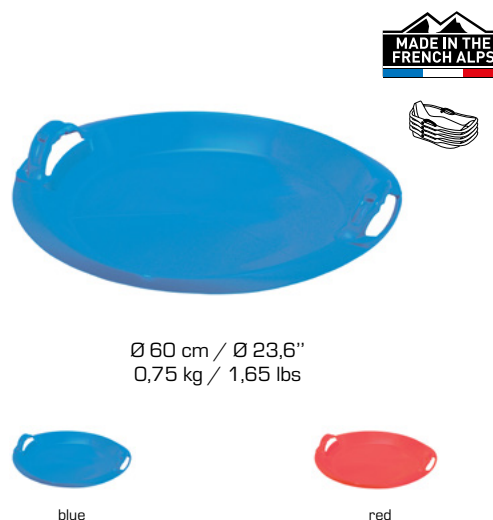

## DIDOO

The same qualities as DIDOO COMFORT without the foam padding!

## FRISBY

Sturdy and fitted with two handles, the Frisby offers maximum thrills as you slide through 360°.

## QUICKY

Guaranteed fun with this shovel sled.

## MIMY

A lightweight sled that little ones are sure to love.

## SLIDY

A sturdy ground-level sled for maximum excitement. Specially for big people!

The Yooner lets you sled down a slope sitting comfortably on a seat mounted on a spring and to turn corners by simply rotating your shoulders, the handle insures great balance. The Yooner's key advantage is that it's easy to handle, great fun and immediately exciting.

The Yooner is for all ages and anyone who wants to share in an easy, fun activity. It's also a way of bringing skiers and non-skiers together and bringing more variety to life in the snow!

## YOONER ENDURO Danube

The Yooner Enduro, which is easy to handle, light and comfortable thanks to its suspension, is also fitted with a genuine carved ski, letting you tackle all snow types. Take it with you wherever you go!

61,5 x 99 x 24,5 cm  
24 x 39 x 9,5"

2,95 kg  
6,50 lbs

Comes with a safety leash  
for chairlifts

For a list of resorts that authorize the Yooner, log on to : [www.tsloutdoor.com/places-where-yooners-used](http://www.tsloutdoor.com/places-where-yooners-used)

Already more than 60 ski resorts in France allow the Yooner on the slopes! If your ski resort does not yet allow the Yooner and you want to offer it to your customers, please contact our Promotions Service ([partenariats@tsloutdoor.com](mailto:partenariats@tsloutdoor.com)) for France or the TSL distributor in your country.

## YOONER ENDURO Vintage [limited edition]

To celebrate 40 years of TSL, the Yooner Enduro is available in a limited version and features the colors of the very first TSL logo: pink and green. Definitely vintage for even more "authentic pleasure"!

61,5 x 99 x 24,5 cm  
24 x 39 x 9,5"

2,95 kg  
6,50 lbs

Comes with a safety leash  
for chairlifts

## YOOLIFT

An accessory allowing the user to use a drag lift with the Yooner.

# SKIMO

## >> Performance and competition

For those who are keen to get away from it all, the SKIMO collection includes the MOVE, RACE, CONNECT and TOUR ranges in their 1 or 2-piece versions. Solid, practical and ultra-versatile poles, in carbon or carbon/aluminium. The winning combo to accompany the most demanding and the most competitive in their adventures in snowy terrain.

## TOUR SERIES

### >> Technicality and versatility

The poles in the TOUR range accompany hikers of all kinds on their most amazing mountain adventures. Technical and versatile, they meet the needs of both summer and winter walkers and offer complete reliability.

## CONNECT SERIES

### >> Practicality and hold

The CONNECT range of poles offers hikers a comfortable walking experience with freedom of movement. The fun and unique "Magnetic system" technology, patented by TSL, allows you to attach your gauntlet to the pole with a snap of the finger: it is as easy to attach as it is to detach, and ensures a secure hold throughout the hike.

## SEMNOZ ALU 2 ICE SKATING

Solidly built and ergonomically-designed, the Semnoz Alu 2 XL Ice Skating Pole is perfect for skating on frozen lakes.

130 > 155 cm / 51,2 > 61" | Ø 18/16  
270g x2 / 0,59lbs x2

Ergonomically-designed handle made from EVA foam, can be held in any direction, ensuring the right balance between power and comfort:

- Easy to pick up and grip
- Rests against the edge of the hand, eliminating unnecessary gripping of the handle

Stainless steel spike for maximum grip and thrust on ice.

The pole floats, and does not have a strap as a safety measure (in case the ice breaks).

External adjustment system with lever for quick and reliable adjustment.

MADE IN  
EUROPE

## KIT CROSSOVER

Suitable for most poles on the market

This CROSSOVER tip adapts to the changing terrain throughout your walk, no matter what sort of ground you're covering.

- Say goodbye to noisy tip impacts: this is ultra-quiet
- It offers great grip, thanks to the 8 spikes which flex upon contact with the ground
- It helps protect walking paths, unlike normal spikes which can erode stony soil
- No risk of injury, unlike traditional tips.

Pole Bag

900g / 1,90 lbs

# toolbox

**TECHNOLOGIES**  
**OVERVIEWS**  
**GOODIES & POP**

All snowshoes of this classic range have been designed and developed for each type of consumer to find the pair corresponding to their specific use. They are made entirely in France with TSL in total control of our production (plastic injection to final assembly) ; This ensures high quality products as well as superior after-sales service.

All of our narrow-waist snow-shoes have been tested in the most extreme temperatures. The special shape (TSL patented) enables you to maintain a normal gait.

## THE IMPORTANCE OF THE FRAME SURFACE.

You should choose the deck size according to your size and the snow conditions. The greater the weight of the walker, the wider the deck required to bear the weight.

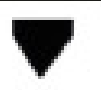

All of our adult frames are available in a range of sizes.

# HYPERflex

concept

## HYPERFLEX FRAME

This frame allows a totally natural foot movement for absolute walking comfort (TSL Patent)

## ANTIBOT PLATES

They enhance the claws grip.

## FRONT TEETH

The front teeth provide maximum traction on steep slopes.

## REINFORCEMENTS

For the first time, TSL has used a design containing reinforcements each having their function that are essential to the effectiveness of the Hyperflex concept. They support the product's distortion constraints during walking and give the Symbioz its overall qualities: flexibility, rigidity, elasticity and light weight.

## CARBON FIBRE COMPOSITE

Carbon fibre composite reinforcements store energy during the flexing phase and restore it at the end of the stride to increase stride power and reduce effort and vibration. Distortion of the SYMBIOZ INSTINCT, PHOENIX, ADJUST, ELITE and STEP-IN frame is progressive, responsive, precise and uniform in both the bending and twisting phases.

## GLASS FIBRE COMPOSITE

Glass fibre composite reinforcements support the SYMBIOZ ACCESS and ORIGINAL 2 distortion constraints to provide a natural stride in both the bending and twisting phases.

## CLAWS

The 8 independent, abrasion-resistant stainless steel crampons (similar to mountaineering crampons) are always located under the foot's pressure points, no matter the size of your foot. They grip is unbeatable.

# THE FRAME

## VERTICAL BLADES

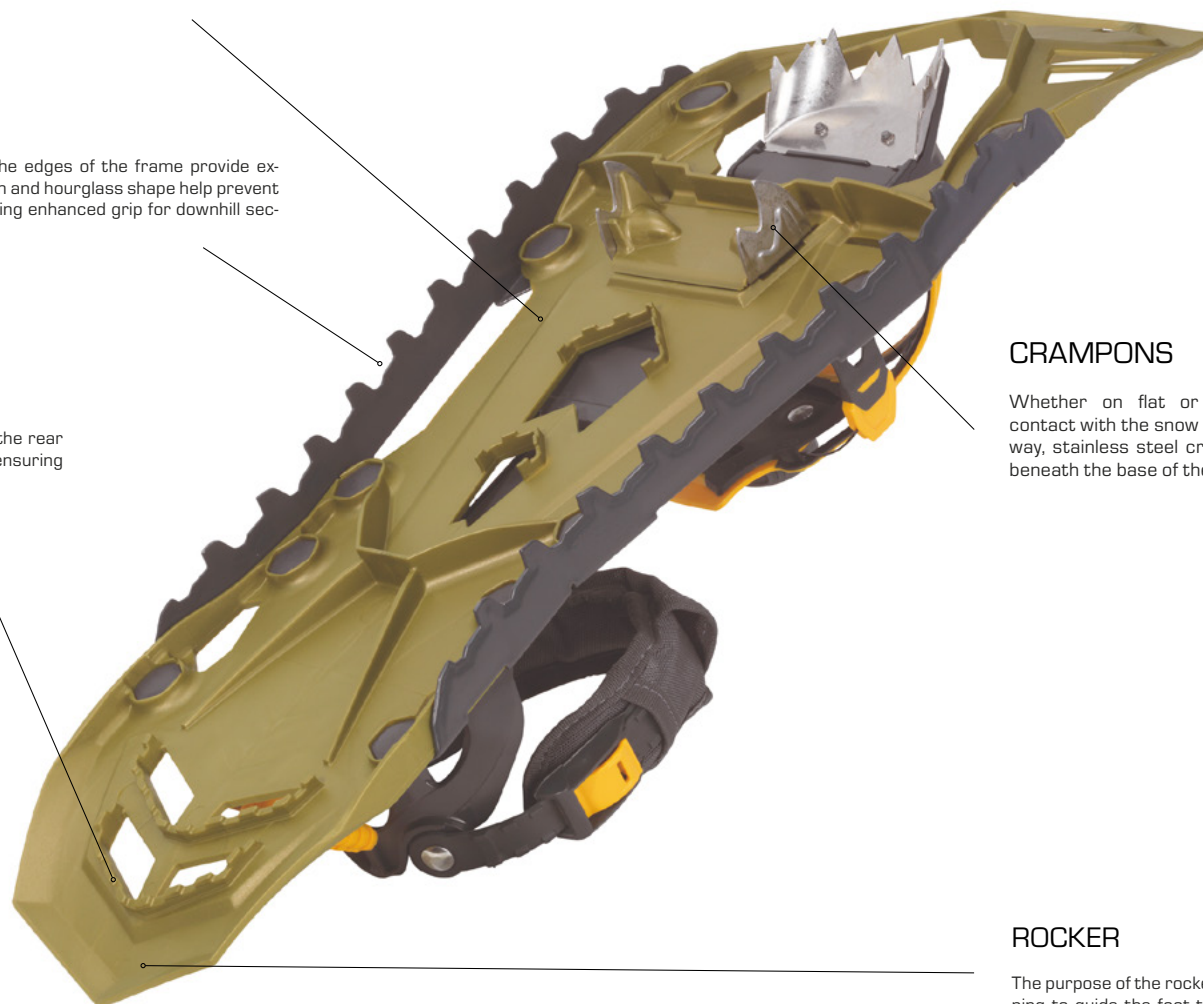

The vertical blades provide superb traction and control on inclines or steep slopes in soft or compact snow.

## LATERAL GRIPS

The interchangeable grips located around the edges of the frame provide excellent grip on all types of snow. The 3D design and hourglass shape help prevent you from slipping while going up, while providing enhanced grip for downhill sections.

## CONTACT GRIPS

A TSL patent, the composite teeth beneath the rear rocker of the snowshoe cut and expel snow, ensuring enhanced grip for downhill sections.

## CRAMPONS

Whether on flat or inclined surfaces, initial contact with the snow is made using these 2 two-way, stainless steel crampons or tips positioned beneath the base of the foot.

## ROCKER

The purpose of the rocker is to cushion your step, helping to guide the foot through the walking process, whether on flat surfaces or inclines.

# BINDINGS

## INSTINCT

The Instinct binding system, patented by TSL, is unique on the market; it combines simplicity, lightness, precision and comfort.

By simply tightening the BOA® Fit System, your shoe and the binding become one. Your heel is freed of any pressure point. The heel lift, which is under the heel whatever the shoe size, avoids any punching effect. All this for 150 g less than for a pair of traditional bindings!

BOA® Fit System : DIAL IN TO FAST, EFFORTLESS, PRECISION FIT.

AGILITY AND SPEED : The BOA® Fit System enables faster, more powerful directional changes through a seamless connection between equipment and body.

POWER AND PRECISION : Power without compromising precision, the BOA® Fit System delivers more explosive action and unparalleled accuracy.

## LATERAL ADJUST

(TSL Patented)

Lateral adjustment to fit perfectly to your foot and memorise its volume.

## MEMORY LOCK SYSTEM

(TSL Patented)

Volume memory, with a final buckle to tighten it onto your foot.

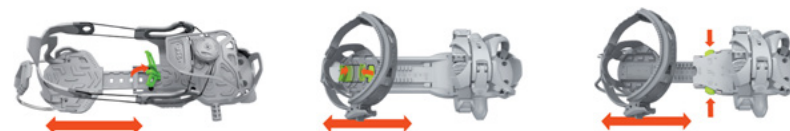

## STRAP TIGHTENING

Front classical tightening with strap.

## LOCK ADJUSTMENT

(TSL Patented)

Just activate the locking system and slide the heel support to the correct position. It will now maintain this setting.

## GLOBAL MEMORY FIT BINDING.

TSL is the only brand of snowshoes to provide a complete memory of the shape of the shoe (size and front volume). This gives excellent control of the foot across a wide range of sizes and in all types of situations. Once these pre-adjustments have been made, the snowshoe can be put on easily and quickly before each outing.

# BINDINGS

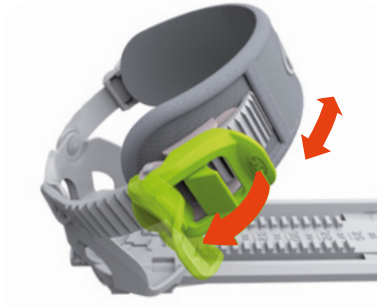

## ANKLE PRE-ADJUST

Enables you to centre the comfort strap on your instep and permanently set its position.

## BUCKLE TIGHTENING

Our bindings include a ratcheting buckle system.

## COMFORT STRAP

Enables you to optimise the contact zones around the ankle strap, providing improved comfort and support.

## HEEL LIFTS

Adaptable to any foot size, our climbing bars offer an average angle of 12° and are always located right under the heel. Because there is no direct contact with the shoes, pressure points are non-existent.

Going uphill, the device lifts the heel. Going Downhill, the back of the binding goes under the deck in order to keep the foot flat, preventing the foot from jutting out at the front of the shoe.

All TSL snowshoes have a Sound and shock absorbing System (TSL Patented).

# POLES TECHNOLOGIES HANDLES

A range of handles to choose from:

## CROSS ST

Long EVA foam handle for walking down hill

## LIGHT ST

EVA foam handle

## CORK CROSS ST

Long Bi-material Cork handle

## CORK ST

Bi-material Cork handle

## SLIM ST

Bi-material soft handle

IT'S MAGIC! With its magical, magnetic, unique and easy to use technology, attaching the wrist strap to the pole is child's play. Don't worry about aiming at the pole; it'll come straight to you. While you're walking it is safely locked into place, so there's no danger of it slipping from your grasp. Finally, removing it is a breeze; just press the button and let go. This is the only Nordic walking glove with a 360° pivot and no index lock, giving you fantastic freedom of movement.

A range of straps to choose from:

An ergonomically designed glove for better grip, comfort and precision. The breathable fabric used and the reinforcement around the circumference make it more effective at withstanding shear pressure while providing enhanced support.  
3 sizes : S M L

This adjustable and removable strap is also extremely comfortable, making it ideal when it comes to changing positions in order to go up or down.

## GRIP

optional grip for short handles located on the balance point of the pole

## MAGNETIC STRAP concept

360°

Glove with a 360° pivot and no index lock gives you fantastic freedom of movement

## HANDLES

### CROSS

Long EVA foam handle for walking down hill + Adjustable ergonomic strap

### CLASSIC

Bi-material polymer handle + Adjustable strap

### LIGHT / ULTRA

EVA foam handle + Adjustable ergonomic strap

## TIGHTENING SYSTEM

### FOLDING SYSTEM

A pole folding system, designed to take up the minimum possible space and extend rapidly. Thanks to both the construction and the perfect cohesion between the different sections, this pole offers excellent resistance and stability

### EXTERNAL LOCK

External tightening technology (magnesium), offering excellent resistance under all atmospheric conditions, as well as a fast and sure adjustment of the poles.

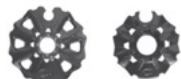

# BASKETS

## TWIST

Rotation system used to change baskets.

## PUSH & PULL

A Patented system, for fast and easy basket mounting and removal.

## SWING

System permitting: baskets can be angled by up to 20° to adapt to the terrain.

# TIPS

all of the tips are made from tungsten, providing excellent grip and great durability.

## CROSSOVER PAD CONCEPT

The Crossover Pad adapts to the obstacles you face throughout your walk to provide extraordinary traction and support, whatever the terrain. 8 multi-crampons adjust their shape upon contact with the ground, hugging the surface and giving you the grip you need.

## SHORT & STANDARD

Straight or bevelled tip fitted with a washer. Poles supplied with Crossover pads.

## SPIKE

Straight or bevelled tip fitted with a washer. Poles supplied with Crossover pads.

## WINTER SPIKE

A bevelled tungsten tip for extraordinary grip on icy snow.
