SAFETY

FIRST RESPONDERS &
INDUSTRIES ON THE FRONT LINE

Safety eyewear are an excellent physical barrier that helps slow the spread of viruses and reduce workplace accidents.

However, whether you wear safety glasses, goggles or protective face shield, fog can quickly become a problem. That's why it is necessary to select a product adapted to both your frequency of use and needs. This range of glasses, goggles, OTG and face shields combines protection and accessibility to protect your highly exposed employees.
