WHO WE ARE

Bollé Safety, global leader in the PPE eyewear market with a history of over 130 years. Experts in our field, we released our first prescription safety eyewear in 1981. Since then, we kept on innovating to provide wearers with high-quality, intuitive and tailor-made products & services.

Through our Excellence Prescription Programme, our dedicated team of optical experts successfully processes 2500+ orders weekly and support our network of opticians in providing the best protection to the thousands of daily users trusting us with their eye safety.

WHY WORK WITH US?

Our Excellence Prescription Programme encompasses all of our prescription operations engineered with one single goal: Correct, Protect and Enhance wearers' vision.

ORDERING PRESCRIPTION SAFETY EYEWEAR HAS NEVER BEEN EASIER !

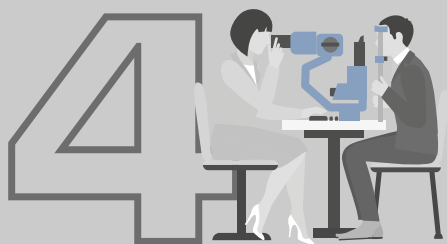

The company selects the frames adapted to its needs.
Its account is created on the webshop
with this product selection.

The company creates a prescription order form.

The employee receives the prescription form
from the company to take to the opticians.

The optician/specialist takes the eye measurements and
places an order on the webshop, which generates
a quote sent to the distributor

The distributor sends its quote to the company.
Once approved, the distributor validates
Bollé Safety's quote on the webshop.

Once the order is validated, the safety eyewear is
manufactured and shipped to the opticians.

As soon as the order is shipped to the optician,
it can be tracked on the webshop.

The optician/specialist confirms the delivery of the eyewear
and contacts the employee to arrange collection.

Bolle Safety invoices the distributor
and remunerates the optician/specialist.
The distributor invoices the company.
