

## Technical Details

MATERIAL: Tek series

SIZE: One size

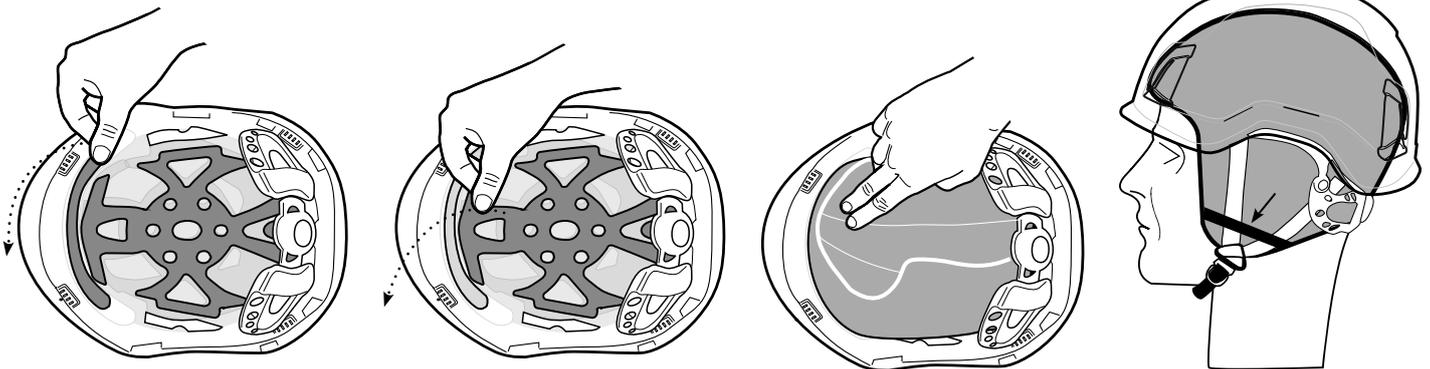

TO USE ON MODEL: Plasma and Zenith

## Features

Tek Series is a particular membrane featuring significant resistance to cold and wind combined with a high level of transpiration and resistance to water.

The external fabric with hydro oil repellent features rejects water with a beading effect leaving the fabric as dry as possible. With water as with mud and oil. The hydro oil repellent feature avoids these elements to penetrate in the fibers therefore it facilitates the cleanliness of the garment
