MORAKNIV®

You already know Garberg – the one and only knife people trust when things get rough in the wild.

Now imagine more of that.

More steel. More strength. More capability.

Meet Garberg Grand.

Same trusted design, same full-tang knife blade, still Garberg – just more of it.

Because yes, size does matter when you only have one knife to handle whatever nature throws at you. From building a camp to batoning firewood, Garberg Grand is your biggest ally in the wild.

BIG, BIGGER, GARBERG GRAND
