

14742 - Amberg Full Flat (S)

Data Sheet Created: 15-10-2026

Amberg Full Flat (S) is a knife made from Swedish stainless steel with a full flat grind. Developed for outdoor cooking and precision work – it delivers clean cuts, low friction, and easy cleaning in the field.

The 108 mm blade is 3.2 mm thick and made of Swedish stainless 14C28N steel. It is hardened and cryogenically treated for high strength and edge retention, with a hardness of 58 HRC. The flat grind with secondary bevel provides low cutting resistance and clean cuts, while the optimized angle makes the knife equally suited for food preparation and carving. The knife is not ferro rod compatible due to its polished spine.

This knife is made in Mora, Sweden.

- Outdoor knife
- TPE rubber handle
