

EYE & FACE PROTECTION ACCESSORIES

NEW STANDARD: EN 166 / 1731 TO EN ISO 16321

KASK

**EN 166 & EN 1731 eye and face protection standards
were replaced by the new EN ISO 16321 standard.**

Previous Standards

Since November 2024

THERE ARE SEVERAL UPDATES IN THE NEW STANDARD:

Expanded Head Forms: The new standard includes testing on six head forms (instead of two) to better represent 95% of the world's population, ensuring broader fit and safety coverage.

Greater Field of View Requirements: This has been expanded to at least 60° with at least 7° above the eye line, meaning users will experience fewer blind spots.

Enhanced Impact Testing: EN ISO 16321 includes increased basic and high-speed impact thresholds. There are new impact categories for low (C), medium (D), and high-speed (E) impacts, so customers will be getting even tougher, more reliable protection.

Improved Markings: Labels and markings are more user-friendly, clearly indicating protection levels and optical quality, making it easier for end users to understand them.

EN ISO 16321 | EYE & FACE PROTECTION FOR OCCUPATIONAL USE

The new European safety standard required for eye and face protection for industrial use.

EN ISO 16321-1:2020 (Part 1)

General requirements

EN ISO 16321-2:2020 (Part 2)

Welding requirement

EN ISO 16321-3:2020 (Part 3)

Mesh visor requirements

MARKINGS

OPTICAL CLASS

1 – Enhanced optical performance (optional)

No marking – Pass

LIGHT PROTECTION CODE

W – Welding filter (scale of 1.2 to 10)

U – Ultraviolet filter (scale of 1.2 to 5)

R – Infrared filter (scale of 1.2 to 10)

G – Sun glare filter (scale of 0 to 4)

L – Lens does not affect color or light

HEADFORMS

1-S – European headform Small

1-M – European headform Medium

1-L – European headform Large

2-S – Asian headform Small

2-M – Asian headform Medium

2-L – Asian headform Large

M – Medium size only (no marking required)

MECHANICAL PROTECTION

C – Low Impact Resistance (45m/s) + OPZ*

D – Medium Impact Resistance (80m/s) + EOZ*

E – High Impact Resistance (120m/s) + FPZ*

CT – Low Impact at Extreme Temp (45m/s)

DT – Medium Impact at Extreme Temp (80m/s)

ET – High Impact at Extreme Temp (120m/s)

HM – High Mass (500g) Impact Resistance

FIELD OF USE

3 – Protection against liquid droplets

4 – Protection against large dust particles

5 – Protection against gas and fine dust particles

6 – Protection against streams of liquid

7 – Protection against radiant heat

9 – Protection against molten metal and hot solids

OPTIONAL REQUIREMENTS

K – Protection against fine dust particles

N – Resistance to lens fogging

CH – Chemical resistance
