

# 14235 - Hunting Narrow Boning (S)

This knife has the capability to perform several tasks. Due to its flexible blade profile made of recycled Swedish stainless steel, it works both as a fillet knife when preparing the meat and when you need to access tight areas when boning.

The ergonomic polymer handle in a hunting inspired colour features a friction grip, finger guard and a 1.76 mm thick blade that provides both strength and stability in every cut and slice. The blade and handle design makes it ideal for working safely and efficiently in various weather conditions during hunting throughout the year. The polymer sheath in a matching hunting colour has a practical lock function and is easy to rinse.
