

# Acccon Click Block ACB 1.8 Height-Safety Devices

**IKAR ACB 1.8** EN 360:2002; CNB 11060 2008 Typ A

**Again one step in front of the world.**

The IKAR Height Safety Device ACB 1.8 designed for fall protection in mobile elevated working platforms is a milestone in the area of personal protection against falls. Tests and certified according to the highest standards for personal protection against falls.

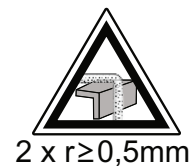

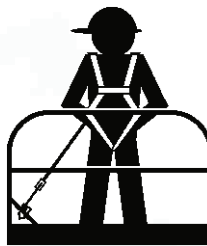

The self-retracting lanyard is tested and certified for the protection in mobile elevated working platforms. The lanyard is tested over a 'double' sharp edge. Innovative technique in the area of internal energy absorbers ensures a maximum arresting force of less than 3 kN at the anchorage point. The lanyard length is 1.8 m furthermore a connector strap of 400 mm from the harness can be used.

**Optional further Lanyards and connecting elements:**

**Connector strap 400 mm**, Order-No. **45-IK 30 B 40 R** as lanyard,  
**IKV 30**, TriLock Steel karabiner 25 kN with pin, Order-No. **4000000030**  
**IKV 13**, Steel karabiner 25kN with Pin, Order No. **400000SK00**
