WHAT ARE YOU UP TO?

BOILING & COOKING

Regulated stoves provide consistent heating power at colder temperatures down to 20°F and higher altitudes. Superior performance for snow melting, rapidly boiling water, and cooking in all 4 seasons.

Four full turns of flame adjustment offers the flexibility to simmer/sauté a gourmet meal or rapidly boil water for dehydrated meals and coffee.

BOILING

Unregulated stoves are a great solution for rapidly boiling water in 3 seasons.

A more economical option for dehydrated meals and coffee on the trail.

Fast. Compact. Efficient.
